EDUCATION

Indian Institute of Technology Guwahati (IITG)

2023 – 2027

BSc (Honors) in Data Science & Artificial Intelligence

- **Relevant Coursework:** Artificial Intelligence Fundamentals, Machine Learning, Data Structures, Data Analysis, Operating Systems, DBMS, Computer Networks, Java Programming, Python Programming

TECHNICAL SKILLS

Programming Languages: C++, Java

Frontend: HTML, CSS, JavaScript, React

Backend & Databases: Node.js, Express.js, RESTful APIs, MongoDB, SQL

Data Structures & Algorithms: Extensive practice across Arrays, Linked List, Stack, Queue, Trees, Dynamic Programming, Greedy, Recursion, and Binary Search through competitive programming and coding platforms.

Computer Science Fundamentals: Object-Oriented Programming (OOP), OS (Processes, Threads, Memory), DBMS (SQL, Indexing), Computer Networks (TCP/IP, HTTP).

Tools: Git, GitHub, VS Code, Postman

PROJECTS

TaskFlow – Full Stack Task Management System | *Node.js, Express, MongoDB, Vanilla JS*

- Built a production-ready full-stack application with JWT-based authentication and role-based access control for secure user operations.
- Designed scalable RESTful APIs supporting task CRUD with advanced querying features like filtering, pagination, and priority-based sorting.
- Strengthened application security using Helmet, rate limiting, CORS policies, and bcrypt-based password hashing.
- Architected a modular backend using MVC pattern, custom middleware, and centralized async error handling for scalability.
- Deployed frontend and backend as live web applications, ensuring seamless API communication and production-level configuration management.

AI Interview Assistant & Resume Generator | *MERN + AI Integration + Puppeteer*

- Developed a full-stack AI-powered interview platform with authentication, protected routes, and report generation system.
- Integrated AI services to generate structured interview reports, feedback, and insights using custom API pipelines.
- Designed scalable backend with file upload (Multer), schema validation (Zod), and modular service architecture.
- Implemented PDF generation pipeline using Puppeteer, converting AI responses into structured documents.
- Built responsive frontend using React, Context API, and custom hooks for state management and API orchestration.

IndiaQuant MCP – AI Stock Market Intelligence Backend | *Node.js, Express, SQLite*

- Built a real-time stock market intelligence backend using Node.js with integration of financial and news APIs.
- Implemented quantitative trading signals using RSI strategy along with sentiment analysis from financial news data.
- Designed portfolio management system with SQLite supporting virtual trading and real-time PnL tracking.
- Engineered options analytics module including options chain processing and Black-Scholes Greeks calculation.
- Developed market analytics tools such as sector heatmaps and oversold stock scanners for actionable insights.

ACHIEVEMENTS & CODING PROFILES

Solved **500+ DSA** and Competitive Programming problems, significantly improving problem-solving and algorithmic thinking.

Building consistent coding proficiency with ratings: **Codeforces (1208)**, **CodeChef (1495)**, and **LeetCode (1580)**. Regularly participate in coding contests and hackathons to test and enhance real-world problem-solving skills under pressure.

Earned multiple certifications in development and core computer science domains alongside continuous DSA practice.
