EDUCATION

Indian Institute of Technology Guwahati (IITG)

2023 – 2027

BSc(Honors) in Data Science and AI

- **Relevant Coursework:** Data Structures, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming, Machine Learning, Artificial Intelligence, Java Programming, Python Programming

TECHNICAL SKILLS

Programming Languages: C++, Java

Frontend: HTML, CSS, JavaScript, React

Backend & Databases: Node.js, Express.js, RESTful APIs, MongoDB, SQL

Data Structures & Algorithms: Extensive practice across Arrays, Linked List, Stack, Queue, Trees, Dynamic Programming, Greedy, Recursion, and Binary Search through competitive programming and coding platforms.

Computer Science Fundamentals: Object-Oriented Programming (OOP), OS (Processes, Threads, Memory), DBMS (SQL, Indexing), Computer Networks (TCP/IP, HTTP).

Tools: Git, GitHub, VS Code, Postman

PROJECTS

JobLens – AI-Powered Job Application Optimizer | *MERN, Gemini API, MongoDB, JWT*

- **Live:** joblens-liard.vercel.app **Code:** github.com/NitinKushwahcodes/joblens
- Built end-to-end job platform with deterministic 4-factor scoring (skills, experience, education, keywords) and resume parsing pipeline (pdf-parse + LLM prompts) extracting data into normalized JSON.
- Integrated Gemini 2.0 Flash with Groq LLaMA fallback for real-time cover letters, recruiter emails, and interview insights; secured via JWT (httpOnly cookies), bcrypt, Helmet, and rate limiting.
- Implemented job tracker with application states, interview round logging, and notes for end-to-end workflow visibility across multiple applications.

TaskFlow – Full Stack Task Management System | *Node.js, Express, MongoDB, Vanilla JS*

- **Live:** taskflowxt.netlify.app **Code:** github.com/NitinKushwahcodes/TaskFlowX
- Architected production-deployed full-stack app with 3-role JWT auth + RBAC across 15+ RESTful endpoints with filtering, pagination, and priority sorting, handling 1,000+ concurrent records.
- Hardened security (Helmet, bcrypt, CORS, rate limiting) and built MVC backend with custom middleware pipeline and centralized async error handler, cutting boilerplate by ~60%.
- Deployed on Render/Railway with environment-separated dev/prod configs, achieving zero downtime across API and frontend.

IndiaQuant MCP – AI Stock Market Intelligence Backend | *Node.js, Express, SQLite*

- **Code:** github.com/NitinKushwahcodes/indiaquant-mcp
- Integrated 3+ financial & news APIs (NSE/BSE) delivering live market data with sub-second response; built RSI signal engine + NLP sentiment analysis generating buy/sell signals across 50+ stocks.
- Delivered Black-Scholes options analytics (Delta, Gamma, Theta, Vega) and sector heatmap scanner processing 500+ datapoints per cycle under 300ms — typically found only in paid quant platforms.
- Designed virtual portfolio system in SQLite with real-time PnL tracking, trade history, and multi-portfolio position management for simulated paper trading.

ACHIEVEMENTS & CODING PROFILES

Solved **500+** **DSA** and Competitive Programming problems, significantly improving problem-solving and algorithmic thinking.

Building consistent coding proficiency with ratings: **Codeforces (1208)**, **CodeChef (1495)**, and **LeetCode (1580)**. Regularly participate in coding contests and hackathons to test and enhance real-world problem-solving skills under pressure.

Earned multiple certifications in development and core computer science domains alongside continuous DSA practice.
